EDUCATION

Dr. Ambedkar Institute Of Technology

Bengaluru, India

Bachelor of Engineering - Electrical & Electronics; CGPA: 8.13

Dec 2022 – Present

EXPERIENCE

AI/ML Intern

May 2026 – Present

CRID India

Bengaluru, India — Remote

- Fixed and deployed **CRID India's website**, adding **SEO**, **analytics**, **Resend email forms**, and a **Google Sheets-based no-code CMS**, driving **1,300+ page views** (+1.2K% growth) and **doubling external client engagement**.
- Building an **advanced RAG pipeline** for internal policy research, covering **document ingestion**, **retrieval**, and **knowledge-base workflows**.
- Delivered, with the team, **AI Auditor and Legal Advisor demo platforms** for the **Bureau of Energy Efficiency (BEE)**, **Ministry of Power, Government of India**, under the **ADEETIE** scheme.
- Contributed to **AI Auditor's** workflow generating **DPR drafts in minutes** (cutting manual auditor effort), and separately to **Legal Advisor's case-tracking workflows** for lawyers.

AI/ML Intern

Jun 2025 – May 2026

Strydden Technologies LLP.

Ahmedabad, India — Remote

- Engineered **Jyotirva**, an **AI-assisted astrology backend** (**Python**, **FastAPI**, **Swiss Ephemeris**) with **15+ REST APIs** across natal charts, Panchang, dasha, compatibility, divisional charts, yogas, and transits; improved accuracy across **1,100+ validated outputs** with validation workflows for **17 endpoints** and **59 passing backend tests**.
- Built a **regulatory compliance assistant using RAG** to answer and compare frameworks such as **HIPAA**, **CCPA**, and **SOC2**.
- Secured **tamper-proof** medical report signing workflows using **SHA-256** hashing and **ECDSA digital signatures**.
- Designed a **25-case security test suite** for a **medical e-signature pipeline**, achieving **68%** overall code coverage and **95–100%** coverage across cryptographic signing, key rotation, and tamper detection modules.

Robotics Intern

Jul 2024 – May 2025

Just Robotics

Bengaluru, India

- Engineered an RC controller using websockets/serial communication; optimized interface latency by **30%**.
- Built a lightweight **Flask** backend to process real-time robotic control signals via WebSockets.

PROJECTS

EvalFlow | *FastAPI, PostgreSQL, Firebase Auth, Cloudflare Queues/Workers* | [Web](#)

Apr 2026

- Built **EvalFlow**, a full-stack **prompt CI/CD platform** for LLM apps supporting **prompt versioning**, **dataset-based evals**, **run comparison**, and **promotion workflows** across **6+** core product flows.
- Implemented a **secure async evaluation system** using **FastAPI**, **PostgreSQL**, **Firebase Auth**, and **Cloudflare Queues/Workers**, with row-level scoring, failure inspection, and reproducible run tracking across **100-row benchmark runs**.

CodeCortex-AI | *Python, FastAPI, LangGraph, GitHub API* | [Code](#)

Feb 2026

- Engineered a **multi-agent code review system** using **LangGraph**, detecting vulnerabilities (SQLi, XSS, auth issues) via **LLM-based security auditing** with **sub-5s latency** (Groq Llama 3.3 70B).
- Integrated **GitHub webhooks** to analyze PR diffs, post structured reviews, and streamline PR validation.

FrameForge | *Python, VideoDB, Redis, LangGraph, Langsmith* | [Web](#)

Jan 2026

- Developed an **AI video pipeline** converting long-form footage into short clips via **multimodal analysis** and AI-driven scene segmentation, with a **fault-tolerant ingestion pipeline** (yt-dlp) achieving **90%** success rate.
- Applied content moderation/virality scoring (**0–100**) using **Groq Llama 3** (**sub-1s** latency); **Redis caching** cut redundant LLM calls by **50%**.

SKILLS

Languages: Python, C, C++, JavaScript, HTML/CSS

Libraries & Frameworks: Flask, FastAPI, Streamlit, Gradio, TensorFlow, PyTorch, OpenCV, NLTK, LangChain, LangGraph, LangSmith, Mem0, Postman, SQLAlchemy

Cloud/DevOps: AWS (S3, EC2), GCP, Docker, Kubernetes, Git, GitHub Actions, Airflow, DVC, Dagshub, Redis

Databases: PostgreSQL, MongoDB, SQLite, Pinecone, Qdrant, Firebase

MLOps & Data Tools: MLflow, Grafana, Prometheus, Jupyter Notebook, VideoDB

ACHIEVEMENTS

- Won the **Best Innovation** award for developing a Drone surveillance system using CV and AI (Tech Nexus 2025).
- Won the **Innovator's Edge** award for developing an interactive Braille script system (Hack Colossus 2024).
